**Indiranagar. Bangalore, 560008**

**LinkedIn**

## EXPERTISE

- **Frontend Development:** React Native, ReactJS, JavaScript, TypeScript, HTML, CSS
- **Mobile Development:** React Native, Flutter (iOS & Android), Redux (Saga, Thunk)
- **Tools & Platforms:** Git, Bitbucket, Jira, Postman, CI/CD (GitHub Actions)
- **Backend & APIs:** REST APIs, Firebase, MySQL

## EXPERIENCE

**Software Developer**
**SpurTree Technologies - Bangalore**
**March 2022 – Present**

**MoonLight Collective App**

- Developed a cross-platform **React Native** app for both Android and iOS platforms, enabling users to explore authentic, local experiences.
- Built a **ReactJS** admin panel to manage and organize community events and user engagement.
- Facilitated community-building by creating features that connect users with common interests, hobbies, and schedules.
- Improved user retention by implementing seamless user experiences and connecting users to local hobbies and activities.

**MePrism App**

- Spearheaded the development of a React Native app focused on data privacy, empowering users to remove their data from Google and hundreds of websites.
- Managed and optimized CI/CD pipelines using GitHub Actions for both Android and iOS, reducing deployment time by 50%.
- Implemented features to block social media platforms from selling user data, ensuring enhanced privacy for users.
- Designed subscription-based services to help users locate and remove personal information from data brokers and people search websites.
- Developed social media privacy controls for Google, Facebook, LinkedIn, and Twitter, preventing Big Tech from tracking users.

**Bira91 Beast**

- Currently leading the **Bira91** Beast project using **Salesforce React Native** to enhance sales functionalities in the application.
- Implemented the **SmartStore** feature, increasing sales efficiency and improving app performance.
- Developed the KYC feature, improving user onboarding and compliance processes.
- Regularly resolve production bugs and enhance app performance through continuous monitoring and optimization.
- **Tech Stack:** Salesforce, React Native, TypeScript, SmartStore, Figma, Jira, Git, ES6.

**Traccar App**

- Utilized **Flutter** to develop a project focusing on the Traccar app, enhancing data visibility and accuracy for software service businesses.
- Built a read-only data display feature, providing real-time API data from the website, improving user experience and service predictability.
- Implemented an iOS Watch app feature for the Traccar app, extending its functionality to wearable devices.
- **Tech Stack:** Flutter, Dart, REST APIs, Figma, Jira, Bit Bucket, Provider.

**Gujarat Technological  University (GTU)**
B.Tech/B.E
2016 to 2019

**Gujarat Technological University (GTU)**
Diploma
2013 to 2016

- English, Hindi, Gujarati

## SPARQATAR (E-commerce)

- Developed a React Native mobile application for SPAR QATAR, a leading hypermarket chain, to enable seamless and user-friendly shopping experiences.
- Built bilingual support (English and Arabic) using i18n to enhance accessibility for a diverse user base in Qatar.
- Focused on performance optimization and intuitive design, contributing to higher user engagement and customer satisfaction.
- Tech Stack: React Native, JavaScript (ES6), Redux, Redux-Saga, REST APIs, i18n, Figma, Jira, Git.

## ShopNow and  Shimplinadhar (E-commerce)

- Led the end-to-end development of multiple e-commerce applications such as ShopNow and Shimplinadhar, tailored for different business needs.
- Implemented responsive UI/UX and performance optimizations to deliver smooth and fast user experiences across devices.
- Integrated multi-language support and real-time features to cater to international markets, boosting user engagement and retention.
- Tech Stack: React Native, JavaScript (ES6), Redux, Redux-Saga, REST APIs, i18n, Figma, Jira, Git.

## L1 Software Developer
## Chirpn IT Solutions - Pune
## Jun 2021 to Fab 2022

**Sportly.Me (Junior Sports Development Platform)**

- Contributed to the development of **Sportly.Me**, a **React Native** app designed to support junior athletes by providing sports-specific workouts, training insights, and access to a diverse athlete community.
- Collaborated on the platform design to help young athletes optimize their training and improve performance.
- Resolved production bugs and issues on a day-to-day basis, ensuring a seamless user experience.
- Focused on improving app performance by optimizing key features and reducing load times.
- Designed and developed new features while fixing critical production bugs, resulting in a more stable and efficient application.
- **Tech Stack:** React Native, JavaScript, Redux, Redux Saga, Figma, Jira, Git, REST APIs, i18n (multi-language support), ES6.

## Software Developer
## First Floor Digital Agency - Mysore
## Dec 2020 to Jun 2021

- During my tenure at this company, I gained extensive hands-on experience with **React Native**, **Flutter**, and **ReactJS**, which marked the beginning of my journey with these cutting-edge technologies. I effectively contributed to multiple projects by leveraging these frameworks to build robust, cross-platform applications. This experience not only strengthened my expertise in mobile and web development but also laid a solid foundation for my continuous professional growth in modern frontend technologies.
- **Tech Stack:** React Native, ReactJS, Flutter, JavaScript, Redux (Saga & Thunk), Adobe XD, Git, REST APIs, ES6
